

**Good for the Economy.
Good for the Environment.**

Dear Members of Congress,

Congress will soon vote on legislation that would compel the Trump administration to honor and plan for meeting the United States' commitment under the Paris Agreement. We, the undersigned members of E2 (Environmental Entrepreneurs), strongly urge you to vote in support of this bill to ensure that we continue to focus on actions to protect our climate and grow our economy.

E2 is a national, nonpartisan group of business leaders who advocate for smart policies that are good for the economy and good for the environment. Our members have founded or funded more than 2,500 companies, created more than 600,000 jobs, and manage more than \$100 billion in venture and private equity capital.

As business leaders, investors and professionals from every sector of the economy who live or do business in every state, we understand the enormous economic promise that can arise if the United States leads on this issue and stays a party to the [Paris Agreement](#).

Thanks in part to federal leadership, more than [3 million Americans](#) now work in clean energy and vehicles jobs. These are residents of every state who go to work every day installing solar panels on homes and commercial buildings, manufacturing wind turbines, and making our homes, schools, vehicles and offices more efficient. By honoring our obligations in the Paris Agreement, America can continue to drive demand for innovative technologies and industries that grow our economy and create jobs.

Studies show that delivering on the Paris Agreement would [unlock at least \\$19 trillion in economic growth](#) globally. The [international clean energy market is already worth an astounding \\$1.4 trillion](#) a year – and set to grow, with America's share pegged at [\\$200 billion annually](#). This economic activity could [fuel an additional \\$26 billion in GDP growth](#) in the United States alone by 2020, which would also provide greater opportunities for U.S. businesses to lead in emerging clean economy markets.

The Paris Agreement is good for American businesses and its workers. Ensuring that we maintain our obligations under this historic agreement is a chance to ensure America leads in clean energy, agriculture, transportation, infrastructure, technology and other sectors instead of falling behind our overseas competitors.

We urge you to vote in favor of legislation that keeps the United States in the Paris Agreement and creates a plan for meeting our nation's commitments.

Sincerely,

487 E2 Business Members and Supporters
